Company Secretary**

Media Release

Financial Times: InfoBeans among 1000 High-Growth Companies in Asia-Pacific Region

20th March 2018, Indore: **InfoBeans** is glad, to announce that it is ranked 297 among 1000 High-Growth Companies of Asia-Pacific region by Financial Times.

This is a list of 1000 fast-growing companies in the Asia-Pacific region, ranked by their compound annual growth in revenues between 2013 and 2016. The ranking was created through a complex procedure. Although the search was very extensive, the ranking does not claim to be complete, as some companies did not want to make their figures public or did not participate for other reasons.

Through research in company databases and other public sources Statista has identified tens of thousands of companies in the Asia-Pacific region as potential candidates for the FT 1000 ranking.

Rank	Name of Company	Location	Sector	Revenue Growth 2013-16	CAGR 2013-16	Revenue 2016('000 \$)	Employees 2016	Founded
297	Infobeans Technologies	India	Technology	153%	36.2%	12,435	616	2011

Criteria for inclusion

To be included in the list of fast-growing companies in the Asia-Pacific region, a company had to meet the following criteria:-

- Revenue of at least \$100,000 generated in 2013 (or currency value equivalent as of December 31, 2013)
- Revenue of at least \$1m generated in 2016 (or currency value equivalent as of December 31, 2016)
- The company is independent (the company is not a subsidiary or branch office of any kind)
- Be headquartered in one of 11 territories in Asia-Pacific listed.
- The revenue growth between 2013 and 2016 was primarily organic (ie “internally” generated)
- If a company is listed on a stock exchange, its share price has not fallen 25 per cent or more in the past 12 months

Companies from these territories were eligible to participate: Japan, South Korea, India, Australia, Hong Kong, Taiwan, Singapore, New Zealand, Malaysia, Indonesia and the Philippines.

Research phase

Statista examined the official revenue data of more than 14,000 public companies in the 11 participating territories to find suitable entrants.

Calculation of growth rates

The calculation of company growth rates is based on the revenue figures submitted by the companies in their respective national currency. For better comparability in the ranking the revenue figures were converted into US dollars. The average exchange rate for the financial year indicated by the company was used for this purpose.

The compound annual growth rate (CAGR) was calculated as follows:

$$((\text{revenue2016} / \text{revenue2013})^{1/3}) - 1 = \text{CAGR}$$

The absolute growth between 2013 and 2016 was calculated as follows:

$$(\text{revenue2016} / \text{revenue2013}) - 1 = \text{Growth rate}$$

Evaluation and quality assurance

All data reported or published by the companies were processed and checked by Statista. Missing data entries (employee numbers address data etc.) were researched in detail. Companies that did not fulfil the criteria for inclusion in the ranking were deleted, as were companies where there was concern over the reliability of the data.

The minimum average growth rate required to be included in the ranking this year was 10.1 per cent.
