ECONOMIC OVERVIEW

After a lackluster performance in 2016, economic activity is projected to pick up pace in 2017 and 2018, especially in emerging markets and developing economies. Stagnant global trade, subdued investment, and heightened policy uncertainty marked yet another difficult year for the world economy. A moderate recovery is expected for 2017, with receding obstacles to activity in commodity-exporting emerging markets and developing economies. Global economic activity is picking up with a long awaited cyclical recovery in investment, manufacturing, and trade. Economic performance across emerging markets and developing economies has remained mixed. Activity slowed down in India because of the impact of the currency exchange initiatives and is expected to pick up over the next 2-3 quarters. However despite this, in the past year, India was the fastest growing large economy with a stable currency that performed better than the most emerging market currencies.

Global GDP growth is projected to increase, rising from just fewer than 3% in 2016 – the slowest pace since 2009 – to 3.3% in 2017 and around 3.5% in 2018. India's economy could expand by between 6.75% and 7.5% in 2017-18, a government survey said, signaling that growth could recover sooner belying grim forecasts inspired by the impact of demonetization. The pace of growth did, however, slow from the growth of 7.4% logged in the second quarter of the fiscal year on account of the cash ban.

It also said structural reforms and Goods and Service Tax could boost growth rate to 8-10%. The GST will create a common Indian market, improve tax compliance and governance, and boost investment and growth. With a uniform tax rate, it is expected that GST will have a positive impact in the medium to long term on the Information Technology sector.

Indian IT industry body NASSCOM forecasts that the sector's export revenues will grow at 7-8% in 2017-18, similar to the growth levels seen last year, as the industry faces continued headwinds from the US market.

The more-than-\$150 billion industry saw exports rising 7.6% last year and revenue for the domestic market is projected to grow at 10-11% in 2017-18.

The sector faces uncertain times as the United States considers tougher US visa policies, raising concerns of higher labor costs as companies look at hiring more expensive US workers. However, we at InfoBeans, with our focused off-shore model remain relatively unaffected by these developments.

The industry is also expected to benefit from positive factors, such as improvements in financial services and digital businesses, while focusing on increasing investments in digitization and automation. In addition the Indian IT industry is expected to add around 130,000-150,000 new jobs during the year.

InfoBeans Technologies Limited was ranked amongst Top 50 IT companies to work for in India –NASSCOM HR Summit, for two consecutive years 2015 and 2016. We were also recognized as “Dream Companies To Work For 2017” at the silver jubilee ceremony of World HRD Congress.

RISKS AND CONCERNS –

This section lists forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these statements as a result of certain factors.

Economic Risk

A part of business is substantially dependent on the prevailing global economic conditions. Factors that may adversely affect economic growth world over that could affect the demand for customized software solutions include slowdown in the rate of implementation of digitization programs, inflation, changes in tax, trade, fiscal and monetary policies, scarcity of credit etc. As our revenues are highly dependent on export of IT solutions, as well as on clients need for digital solutions; an economic slowdown or other factors that affect the economic health of the nation or those client industries, or any other impact on the growth of such industries, may affect our business.

Competition Risk

This risk arises from more players wanting a share in the same pie. Like in most other sectors, opportunity brings with itself competition. We face different levels of competition in each sector, from domestic as well as multinational companies. Intense competition in the market for information technology services could affect our pricing, which could reduce our share of business from clients and decrease our revenues. However, InfoBeans has established strong brand goodwill with our clients and a strong foothold in a wide spectrum of IT services. We have built a strong relationship with key client accounts and as a result are able to obtain competitive commercial terms and operational advantages. We also counter this risk with the quality of our offerings, our customer-centric approach and our ability to innovate customer specific solutions, focusing on creating WOW and aggressive go-to-market strategy, disciplined and time bound project executions, coupled with prudent financial and human resources management and better control over costs. Thus, we do not expect to be significantly affected by this risk.

Trade Risk

Our engagements with customers are typically continuous in nature and normally provide for subsequent engagements. Our business will suffer if we fail to anticipate and develop new services and enhance existing services in order to keep pace with rapid changes in technology and in the industries on which we focus. Disruptions in technology, system failures, trade bans could negatively impact our operations and ability to provide our services and solutions. A large part of our revenues is dependent on top clients and the loss of any one of them could significantly impact our business.

Given the projected growth in the Indian economy it is estimated that demand for our services will continue to rise steadily. The Company is further reducing its dependence on a single geography by establishing a wider global footprint. Thus, we believe we have adequate mitigation in place for trade risk.

Regulatory Risk

If we are unable to obtain required travel documents, approvals and licenses in a timely manner, our business and operations may be adversely affected. We require certain approvals, licenses, registrations and permissions for setting up business operations in new geographies. We may encounter delays in obtaining these requisite approvals, or may not be able to obtain such approvals at all, which may have an adverse effect on our revenues. However, the

Government has come up with a number of initiatives to boost the information technology sector and has planned incentives sector. As all industry predictions suggest that this will be the trend in the future as well and given our own experience in obtaining such permissions, we do not expect this risk to affect us materially in the coming years.

Liability Risk

This risk refers to our liability arising from any damage to technology, equipment, office premises, life and third parties which may adversely affect our business. The Company attempts to mitigate this risk through contractual obligations and insurance policies.

Execution Risk

The Company has undertaken number of projects in the last year and several more are in the pipeline. Contracts are often conditioned upon our performance, which, if unsatisfactory, could result in lower revenues than previously anticipated. Some of our long-term client contracts contain benchmarking provisions which, if triggered, could result in lower future revenues and profitability under the contract. Our increasing work with governmental agencies may expose us to additional risks. Any delay in project implementation can impact revenue and profit for that period. Our implementation schedules are in line with the plans. Emergency and contingency plans are in place to prevent or minimize business interruptions. Therefore, we do not expect this risk to affect us materially in the future. Concerns such as an unfavourable tax structure, infrastructure bottle-necks, retaining talent and unprecedented natural and man-made disasters and political/social turmoil which may affect our business, remain. However, these are threats faced by the entire industry. With superior methodologies and improved processes and systems, the Company is well positioned to lead a high growth path.

OPPORTUNITIES

India is the topmost off-shoring destination for IT companies across the world. Having proven its capabilities in delivering both on-shore and off-shore services to global clients, emerging technologies now offer an entire new gamut of opportunities for top IT firms in India. Social, Mobility, Analytics and Cloud (SMAC) are collectively expected to offer a US\$ 1 trillion opportunity. Cloud represents the largest opportunity under SMAC, increasing at a CAGR of approximately 30 per cent to around US\$ 650-700 billion by 2020. The social media is the second most lucrative segment for IT firms, offering a US\$ 250 billion market opportunity by 2020. The Indian e-commerce segment is US\$ 12 billion in size and is witnessing strong growth and thereby offers another attractive avenue for IT companies to develop products and services to cater to the high growth consumer segment.

THREATS

- Competition from local and multinational players
- Execution risk
- Regulatory changes
- Attraction and retention of human capital

ANNEXURE- B TO INDEPENDENT AUDITORS' REPORT**Report on the Internal Financial Controls under Clause (i) of sub-section 3 of Section 143 of the Companies Act, 2013 ('the Act')**

We have audited the internal financial controls over financial reporting of InfoBeans Technologies Limited (Formerly Known as InfoBeans Systems India Private Limited)('the Company') as of 31st March 2017 in conjunction with our audit of the Standalone Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the 'Guidance Note') and the Standards on Auditing, issued by ICAI and deemed to be prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of the Management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or

improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

2. Significant Accounting Policies

a. Basis of Preparation of Financial Statements

These financial statements are prepared in accordance with Indian Accounting Standards/Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory accounting standards as prescribed by the Companies (Accounting Standards) Rules, 2014 and the provisions of the Companies Act, 2013. Accounting policies have been consistently applied except where a newly-issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

All amounts included in the financial statements are report in Lakhs of Indian rupees except share and per share data unless otherwise stated. Due to rounding off, the numbers presented throughout the document may not add up precisely to the totals and percentages may not precisely reflect the absolute figures.

b. Use of Estimates

The preparation of the financial statements requires the management to make judgment, estimates and assumptions that affect the accounting policies, reported balances of assets and liabilities on the date of the financial statements and reported amounts of income and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

c. Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is primarily derived from software development and related services. Contracts with customers are arranged either on time and material basis or fixed price basis or fixed time-frame basis. Revenue with respect to time and material contracts is recognized as related services are performed.

Since there is no ambiguity about measurement or collectability of consideration, Revenue from fixed price and fixed time frame contracts are recognized in accordance with the percentage completion method under which revenue is recognized on the basis of cost incurred in respect of each contract as a proportion of total cost expected to be incurred. When there is ambiguity about measurement or collectability of consideration, recognition is deferred until such ambiguity is determined.

Revenue from annual technical service contracts/ fixed time-frame basis is recognized in proportion over the period in which such services are rendered.

Revenues are presented net of sales tax, value added tax, service tax and applicable discounts and allowances.

d. Fixed Assets

Tangible Assets are stated at cost of acquisition less accumulated depreciation and impairment loss, if any. Cost includes all identifiable expenditure incurred in their acquisition and construction/ installation and other related expenditure incurred to bring the asset to the location and condition necessary for it to be capable of being operated in the manner intended by the management.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2017

Capital work in progress comprises of the cost of fixed assets that are not yet ready for their intended use at the reporting date. The Company identifies and determines separate useful lives for each major component of the fixed asset, if they have a useful life that is materially different from that of the asset as a whole.

When parts of an item of property, machinery and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

An item of tangible assets is derecognized on disposal or when no future economic benefits are expected from its use. Gains or losses arising from derecognition of fixed assets are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

Intangible assets are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortization and impairment losses, if any.

Gains or losses arising from the retirement or disposal of an intangible asset are determined as the difference between the net disposal proceeds and the carrying amount of the asset and recognised as income or expense in the Statement of Profit and Loss.

e. Depreciation and Amortization

Depreciation on fixed assets is provided at the rates and in the manner specified in Schedule XIV of the Companies Act, 1956 / Schedule II of Companies Act, 2013, wherever applicable on written down value method. Intangible assets are amortized on a straight line method over their estimated useful lives.

Effective April 01, 2014, the Company has with retrospective effect changed its method of providing depreciation on fixed assets related to Leasehold Improvements, Electrical Installation, Air conditioner from the 'WDV' method to the 'Straight Line' method over the lease period. Management believes that this change will result in more appropriate presentation and will give a systematic basis of depreciation charge, representative of the time pattern in which the economic benefits will be derived from the use of these assets.

f. Investment

Current investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are carried at the lower of cost and fair value of each investment individually. These consolidated financial statements are prepared in accordance with Indian Accounting Standards/Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises mandatory accounting standards as prescribed by the Companies (Accounting Standards) Rules, 2014 and the provisions of the Companies Act, 2013. Accounting policies have been consistently applied except where a newly-issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

All amounts included in the consolidated financial statements are report in Lakhs of Indian rupees except share and per share data unless otherwise stated. Due to rounding off, the numbers presented throughout the document may not add up precisely to the totals and percentages may not precisely reflect the absolute figures.

b. Basis of Consolidation

The consolidated financial statements include the financial statements of InfoBeans and all its subsidiaries, which are owned or controlled. Subsidiaries are consolidated from the date control commences until the date control ceases. The financial statements of Group companies are consolidated on a line by line basis and intra-group balances and transactions are eliminated. The financial statements are prepared by applying uniform accounting policies in use at the Group. Since all the subsidiaries, are owned and controlled 100% by InfoBeans as on the closing date, there is no minority interest and Goodwill/capital reserve.

c. Use of Estimates

The preparation of the consolidated financial statements requires the management to make judgment, estimates and assumptions that affect the accounting policies, reported balances of assets and liabilities on the date of the financial statements and reported amounts of income and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made if the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

d. Revenue Recognition

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2017

Revenue with respect to time and material contracts is recognized as related services are performed.

Since there is no ambiguity about measurement or collectability of consideration, Revenue from fixed price and fixed time frame contracts are recognized in accordance with the percentage completion method under which revenue is recognized on the basis of cost incurred in respect of each contract as a proportion of total cost expected to be incurred. When there is ambiguity about measurement or collectability of consideration, recognition is deferred until such ambiguity is determined.

Provision is recognized when there exists a present obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are not discounted to present value and are determined based on best estimates required to settle the obligation at the reporting date. These estimates are reviewed at each reporting date and adjusted to reflect the current best estimates.

Disclosure of contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made.
